Description

I have located the meteorite fall area, that an old miner friend of mine, witnessed in 2005, in a remote area of the Mojave Desert. The alluvial in this area does not have any desert varnish. Also in the area are numerous coral rocks, and many of the Fall Rocks have coral fused to them. A X-Ray Spectrometer Analysis on the Fall Rocks listed 43 out of the 59 elements on the test sheet. Fe 50.18%; Ti 9.31%; Al 4.54%; Mg 1.79%; Ca .85%. The others ran from a trace to Mn .088%. Including 9 of the Rare Earth elements. Also Cu, Cr, Pb, Zn, Sn Ga, Sb and more. These Fall Rocks make beautiful cabs when cut and polished. I am a prospector who lives in the area and do all my mining with simple hand tools. I'm selling these meteorites in lots, they are as I find them, uncleaned and some are fractured from impact with the earth. They are all magnetic, but by themselves do not attract iron filings. Note: Meteorites contain a higher percentage of the Noble Metals than the Earth's crustal rocks but the Earth has a higher percentage of the rare earth metals. The end view picture shows the free gold and gold also shows in the panning of the saw cuttings. I can not guaranty free gold in each piece. In April 2008, Reed Laboratories, Carlsbad California did the an analysis on a 3oz. fall rock, minus Au/Ag/Pt, mentioned above. No Ni showed above their testing limit of .0001%. Recently I sent Reed Laboratories the end pieces from 4 different fall rocks from 4 different areas of the fall-site to do an analysis of 70 elements, including Au/Ag/Pt. The above analysis and the latest analysis will be sent to all buyers, both past and present. At this time they are unclassified. The average weight of these fall-rocks measures 4.8 grams per cubic centimeter, which is higher than the typical gold, copper and iron ores found in this area. I can prove beyond a doubt that these fall rocks are meteorites. I recently saw a test report on the moon-rocks and meteorites that had no Ni, but showed high in Ti/Al/Mg. Google in Meteorites, Ti/Al/Mg. Also, a good web-site on the elements, [www.webelements.com](#). Thanks for your interest.

I recieve my Mail on Thursday and Mail all orders the next day on Friday. I accept U.S. Postal Money Orders
